★★★★★ **Brilliant book!**  
26 November 2018  
Format: Paperback | **Verified Purchase**

I am so impressed with this book!

My 4-year-old son loves the drawings and the range of experiments for us to try in there and as a science teacher I love the detail that has been added. This isn't just a book of fun things to do, you end up learning without even trying.

I got a second copy for my friend's son and she has confessed to me that she tried a few while her kids were at school and she had a great time!

Break down the material into a helpful number of sections. Too many sections make it hard to remember and keep straight.

The aim of a summary is to support you to organise a lot of information – it's not meant to replace the more detailed bit
